

PCR Only Panels

- Bespoke panels & individual tests available
- Rapid and sensitive detection of microbes through Real-time PCR
- Non-invasive screening method, in line with the 3Rs
- Routine validation checks
- Comprehensive overview of rack health
- Regular screening assists in prevention & containment of pathogen spread
- Complimentary to health-screening programmes – such as EAD & SFD samples available
- Experienced team on-hand to advise on appropriate sample type for each agent
- Urgent premium service 24-hour turnaround time

DOS= Dry oral swab (for PCR only)

E = Environmental swab

EAD = Exhaust Air Dust

F = Faeces

FS = Fur swab

* Available upon request

** **Helicobacter spp:** if positive, can be tested for the following species -

H. bilis, *H. hepaticus*, *H. rodentium*, *H. ganmani*, *H. mastomyrinus* and *H. typhlonius*

Histology is available for all species upon request

SFF= Sentinel Free Filter

SSw= Skin Swab

WA = Whole animal

PCR = Polymerase Chain Reaction
